Basic Points for establishing Quality Assurance for the various Products-Deliverables

For the development of each work package and the materialization of its products/ deliverables it is useful to keep records/ comments/ opinions concerning the following points:

- Conformity to Goals and Objectives
  - Of the project itself, as they were identified in the proposal
  - Of the Erasmus+ programme
  - Of the national and/ or EU priorities and policies
- Quality of the results/ products and suitability for the target groups

- Impact/ Contribution of the results / products at local/ national/ international level as well as practical aspects that identify their value (e.g. European added value, by teachers' formal qualifications acquired by teachers etc.)
- Prospects/ actions for exploitation and dissemination
- Prospects/ actions for sustainability
- Obstacles overcome or deficiencies addressed and lessons learned
- Indicators that show results relative to what was planned
- Strengths and weaknesses of each result
- Content quality
- Overall significance of each result for target audience (user friendliness), structures or systems

Furthermore, the communication of any of these elements to the partners (at various stages but mainly at the meetings or during the preparation of the Reports) will help for feedback and for identification of the necessary issues concerning the development of the products and the interim and final reports.
